

## Overview

Since 1977, Solomon Ward Seidenwurm & Smith, LLP, has provided superior legal services to a wide range of clients. From Fortune 500 companies to emerging entrepreneurs, our clients appreciate the sophistication, expertise and professionalism our attorneys provide.

Many of our attorneys were formerly with much larger firms, so we are able to deliver services of the same caliber in a more affordable and personal manner. Our mid-sized firm is large enough to handle a wide range of practice areas, yet small enough to tailor our services to each client.

We take pride in our ability to be accessible and responsive to our clients, while providing practical legal solutions at a reasonable cost.

**100 Percent Club**  
**San Diego County Bar Association**

Demonstrates an outstanding commitment to the work done through SDCBA programs and services.

Technology has changed the legal profession. Our firm is proud of its position as a national leader because of our implementation and use of the newest legal technologies. Because of our commitment to serving our clients, we have invested in, installed, and operate cutting-edge hardware and software. That investment has increased the quality of our services while decreasing our clients' expenses.

#### **DEFINING** ELECTRONIC DISCOVERY & ESI

Most documents and information today are electronic and often never printed. They are found on computers, networks servers, mobile devices such as phones and tablets, backup tapes, and "in the cloud." Litigation discovery requires a firm to locate, collect, process, analyze, and review this data. Almost all legal discovery is now electronic.

Federal rule changes in 2006 introduced a new phrase into lawyers' vocabularies - "electronically stored information" - ESI. That's all digital information or data stored in any media or at any location. Discovery of ESI, integral to modern litigation, requires specialized hardware and software to process, analyze, review, and produce that discovery and evidence. That ability produces many benefits but can cause unnecessary costs. We use our computer resources to a client's benefit while reducing the expenses of litigation.

## State-of-the-Art Technology Tools

To preserve, process and review ESI of all types

### Our ESI Services Save Time and Expenses

Today's electronic discovery can produce substantial evolutions and costs. Litigation can make the preservation, collection, processing and review expenses grow exponentially. To lessen this impact on our clients, we have invested in and installed hardware and software that allow us to execute these tasks more economically.

A recent Rand Corporation study found that electronic discovery costs were predominantly the result of human, legal review.

Our trained and certified ESI team uses our software to decrease the number of documents that pass to the legal review phase of electronic discovery, saving time and money. Our service capacity is substantial enough that we can provide those same ESI services to other firms and lawyers at the prices we charge our own clients.

#### National Technology Award Winner

It was this commitment to technology that helped Solomon Ward win the Law Technology News National Innovation Award – which recognizes outstanding achievement in integrating technology into legal work to help deliver better, faster and less expensive services to clients.

#### Forensic Toolkit® (FTK®)

*The Standard in Computer Forensics Software*

Comprehensive processing and indexing tool for client data that makes filtering and searching faster

Provides the ability to zero in on relevant evidence quickly – dramatically increasing analysis speed

Supports multiple email types, including Notes NSF, Outlook PST/OST, Exchange EDB, Outlook Express DBX, Eudora, EML, Netscape, AOL and RFC 833

Quickly identifies critical image and video files

Enables users to take only relevant data into our review and production tool – Summation

#### Summation®

*All-in-one Data Processing, Early Case Assessment and Final Review Production Tool*

Utilizes Technology Assisted Review ("TAR")

Advanced visualization graphics simplify and establish communication patterns

Compatible with FTK® and MPE+®

Transcript support with color highlighting

Near native and word boundary redaction

Concept searching minimizes human review time

Near duplicate analysis

Advanced case data filtering

Email threading

Ingests over 700 native file types

#### Mobile Phone Examiner PLUS® (MPE+®)

*The Preferred Choice for Mobile Device Discovery*

Stand-alone software with intuitive interface, data visualization and smart device support

Allows user to collect, preserve and review data efficiently from almost any mobile device

Integrates seamlessly with FTK®, enabling correlation of evidence from multiple mobile devices with multiple computers

#### X1 Social Discovery™

*Social Media and Web Collection Tool*

Collects data from leading social media sites, including Instagram, Facebook, Twitter and LinkedIn

Authenticates social media content, websites, webmail and YouTube

Utilized to crawl, capture and instantly search content from websites, webmail and YouTube

Investigative tool used to research opponents in an array of legal matters
