THE PROGRAM

The conventional view of cyber security is that all technical problems can be fixed through the application of technology. Unfortunately, the cyber security landscape is much more diverse and complex than we tend to believe. San Diego's FBI cyber task force shares its experiences about cyber threats so that you can better navigate this hostile landscape. You will walk away with the understanding that cybersecurity is ultimately a function of *people*, not technology.

THE PANELISTS

**Hon. Mitch Dembin, U.S. Magistrate Judge, Southern District of California
Tim Hamon, Forensic Examiner, San Diego Regional Computer Forensics Laboratory, FBI**
